A5 · Serializer
deterministic CSV to YAML
(no LLM call)
[C0-C4]
serialization
Reference-derived metrics
service and interaction P/R/F1
against the reference architecture
available only at generation time
removed in the C5 control
scores
Complete workflow (C1)
C2 (no refinement)
Final architecture proposal
services + interactions
consolidated output
[C1, C2, C4]
refined Proposal A
[C3]
Proposal A
[C0]
A3 · Consolidator
selects a base proposal; may add
justified interactions among
existing services
[C1, C2, C4]
A1 · Software Architect
generates Proposal A
[C0-C4]
Proposal A
A4 · Domain-Driven Refiner
refines each proposal;
removes unsupported interactions
[C1, C3, C4]
refined proposals
Proposal B
generates
C2 (no refinement)
Requirements
45-78 bullet statements
generates
A2 · Communication Specialist
generates Proposal B
(50-pattern catalog)
[C1, C2]
Proposal B
generates
A2.1 · Generalist Architect
generates Proposal B
(alternative)
